

EES 1400-3 – Triple-Head Angle/ Corner Grinder

The NEW EES 1400-3 is Triple-head Grinder, which is revolutionizing precision grinding in tight spaces. With user safety and efficiency in mind, the EES 1400-3 comes with a dust protection system and extraction port, as well as soft-start, speed regulation, and constant speed control. Increase productivity and reduce fatigue to achieve optimal grinding results!

The triple-head design ensures a fast and uniform removal rate, maximizing efficiency and effectiveness in grinding. It is also designed for an easy, fast change out of grinding wheels, which are specially designed for use in either screed, concrete, or coating, adhesives, paint, plaster, and more.

Engineered in Germany, this state-of-the-art grinder is equipped with a 1-3/4" disc diameter, which is built to tackle edges, angles, and small areas with unparalleled precision. From window reveals to niches and even under radiators, the EES 1400-3 is even ideal for overhead work.

In stair and tile renovations, the EES 1400-3 offers a level of precision and efficiency that is unmatched in the industry. Its ability to grind right up to the edge, coupled with a removed brush rim, ensures seamless results in every application.
