

## **ETR 400.2 P – Wet Cutting Circular Saw**

The ETR 400.2 P wet-cutting circular saw is an indispensable tool for precision cutting in construction and landscaping. Made in Germany, the 24 amp, 120V motor comes equipped with a 6" maximum cutting depth, to tackle materials like reinforced concrete and stone. It is the ideal saw for wall cuttings, breakthroughs into brickwork, and civil engineering tasks.

The cut-off carbon brushes provide an additional layer of protection for the motor, enhancing the durability and reliability of the ETR 400.2 P. This feature ensures that the motor remains safeguarded against potential damage, extending the tool's lifespan.

The enhanced features such as temperature control, over-current cut-off, electronic soft-start, overload indicator, and constant speed control allow for increased longevity and increased safety. The ergonomic, adjustable handle further enhances the user experience by accommodating different working positions and cutting tasks. Comfort meets precision, making prolonged use a seamless and enjoyable experience.

Furthermore, the reduced weight of this saw reduces fatigue and ensures operator comfort. Efficiency meets innovation in every cut. Stay ahead of maintenance with the service indicator that lights up, providing a 10-hour warning in advance for carbon brush replacement. This proactive feature prevents unexpected downtime, allowing users to plan maintenance efficiently.
